

0.1 Monk Mobility: Fast Movement before/after Flurry v1.0

Add the following text to the Monk's Fast Movement class feature:

A monk with Fast Movement and the Flurry of Blows class features can forego his 5ft step to move up to his Fast Movement speed before or after a flurry as a free action. This is normal movement and subject to Attacks of Opportunity. If the monk is using Ki to enhance his speed for the round this extra speed is added to the Fast Movement rate. (*Base speed and other bonuses to speed in general do not add to this.*)

0.1.1 Explanation

Monks are supposed to be a high-mobility class, but Flurry of Blows is a full-round action, forcing the monk to not move if he wants to have the full benefit (and full BAB!).

0.1.2 Version history and future

This is the first version.
